

08M51 OMBRACKET

08M51 AMDCPLUG

08M51 AMEYEDL

At Honda we know that taking care of your starter battery is essential to ensure it stays fully charged during periods of non-use. The Honda OptiMate 3 Battery Optimiser is the answer. It's specially designed for modern batteries from 2 to 32 Amp-hours capacity with the ability to diagnose, charge, check and maintain your battery automatically for months. All major battery manufacturers recommend maintaining starter batteries

Included with the Honda OptiMate 3 Battery Optimiser are two interchangeable connection harnesses, one with clamps for bench charging, and the other for permanent connection to the motorcycle's battery to allow easy reconnection of charger when necessary.
