

Comfort on the Move

- ⇒ 5 step adjustable heating levels
- ⇒ New LED indicator with voltage monitoring function to prevent the heated grips from draining the battery
- ⇒ New improved controller, which can be easily operated with gloves
- ⇒ Improved “wraparound” connection between heating elements and wiring
- ⇒ Improved energy efficiency and heat generation

These specification details do not apply to any particular product which is supplied or offered for sale. The manufacturers reserve the right to vary their specifications, including colour, with or without notice and at such times in such manner as they think fit. Major as well as minor changes may be involved. Every effort, however, is made to ensure the accuracy of the particulars contained in this brochure. This publication shall not constitute in any circumstances whatsoever an offer by the Company to any person. All sales are made by the Distributor or Dealer concerned subject to and with the benefit of the standard Conditions of Sales and Warranty given by the Distributor or Dealer, copies of which may be obtained from him/her on request. Whilst efforts are made to ensure specification accuracy, brochures are prepared and printed several months in advance of distribution and consequently cannot always immediately reflect either changes in specification or in some isolated cases the provision of a particular feature. Customers are always advised to discuss specification details with the supplying Dealer or Distributor, especially if your model selection is dependent upon one of the features advertised.

Endure the Elements

Genuine Honda Heated Grips

Heat at Your Fingertips

Out on the road you can face driving wind and torrential rain – with everything in-between. At Honda Access we know that being comfortable can make the difference between a pleasurable ride out and a painful ride home.

Even in the most demanding conditions, the Honda heated grips will keep your fingers from going numb, allowing you to keep full control over your bike. Its 5 variable heat levels offer the comfort you require, while the compact handlebar controller can be easily manipulated even with your gloves on. Your ride will no longer be dictated by the elements.

Easily installed

Honda heated grips can be fitted quickly and easily to almost all Honda motorcycles and scooters to provide warmth in the city or on the open road.

Check with your local Honda dealer for more information on fitting them on your Honda.

Enhanced energy efficiency and heat generation
The Honda heated grips' innovative design limits the heat loss to a minimum. The stainless steel heating elements ensure optimum heat generation allowing you to enjoy your ride.

Improved "wraparound" connection
The new design with improved "wraparound" connection between the heating elements and the wiring ensures reliability. The heated grips can easily stand heavy-duty use.

New improved controller

The new improved controller can be easily operated, even when you are wearing gloves. The controller also includes a handy and highly visible heat level indicator, so you can check the status of the heated grips at a glance.

Heat whenever, wherever

Temperatures can change quickly. The 5 stage sequential control, conveniently mounted on the handle bars, allows you to regulate the temperature for every ride. Regardless of the conditions, a winter or a chilly summer morning ride, you can always enjoy the perfect temperature.
